## EDUCATION

### Bachelor of Science in Information Technology

San Pedro, Laguna

*Colegio de San Pedro*

*June 2015 - May 2019*

- Designed and developed responsive landing pages using HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Developed a web application using PHP with Object-Oriented Programming (OOP) principles for the backend and MySQL for the database.

## TECHNICAL SKILLS

**Frontend:** React, Next.js, TypeScript, Tailwind, Zustand, Material UI

**Backend:** Node.js, Express, MongoDB, PHP, MySQL

**Tools:** Git, GitHub, Vercel, Docker

## EXPERIENCE

### Web Content Developer

Makati, Philippines

*Core-x Design inc. | Bigcat Software Solutions, Inc.*

*March 2022 - June 2025*

- Led and mentored a team of web content developers; assigned, reviewed, and approved tasks in Jira to ensure timely and high-quality delivery.
- Collaborated with the SEO team to optimize website performance by updating Google Analytics, metadata, robots.txt, sitemaps, domains, and SEO content.
- Built and maintained reusable UI components—including data tables, forms, menus, sections, modals, accordions, carousels/Slider cards, headers, and footers—using Next.js, React, Tailwind CSS, and MUI to improve scalability, accelerate development, and ensure design consistency across applications.
- Collaborated with cross-functional teams—including software developers, business analysts, quality analysts, and project managers—to leverage a custom-built CMS and backend support, ensuring seamless API integration and consistent delivery of dynamic content to UI components.
- Utilized Git for version control—managing branches, commits, pull requests, and code reviews—to ensure clean, collaborative, and efficient development workflows.

### Web Developer

Pasig, Philippines

*One Contact Center*

*May 2019 - March 2022*

- Designed and developed responsive websites for small businesses in the U.S., showcasing company profiles, products, and services using HTML, CSS, JavaScript, jQuery, Bootstrap, SCSS, and WordPress.
- Implemented dynamic features such as user authentication, registration, and CRUD functionality with PHP and MySQL to enhance website interactivity.
- Optimized websites for search engines by updating SEO metadata, canonical tags, sitemaps, robots.txt, structured data, and Google Analytics integrations, boosting online visibility.
- Ensured cross-browser and multi-device compatibility for seamless user experience across platforms.
- Managed file deployments and version updates via FTP/WinSCP, and administered databases, domains, emails, SSL certificates, and security settings through cPanel.
- Customized and maintained WordPress themes and plugins, while also managing other website builders to deliver tailored solutions for client needs.
